Profile summary

Data Science and AI enthusiast with hands-on experience in machine learning, NLP, and LLM-based applications. Proficient in Python and modern AI frameworks, with experience building and deploying data-driven solutions.

Skills

Languages: Python, SQL.

Machine Learning: Regression, Classification, Scikit-learn.

Deep Learning: TensorFlow, PyTorch, Keras.

Generative AI & NLP: Transformers, LLMs, NLP.

Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA).

Visualization: Power BI, Tableau, Excel.

Cloud & Tools: AWS (EC2, S3), Docker, Git, Streamlit, Airflow.

Project Work

Titanic Survival Prediction API

Feb 2026

Key Skills: Python, Scikit-learn, FastAPI, Docker, CI/CD.

- Built and deployed an end-to-end machine learning system using Scikit-learn pipelines for survival prediction.
- Developed a FastAPI-based REST API for real-time inference with structured logging and custom exception handling.
- Containerized the application using Docker and implemented release-based CI/CD using GitHub Actions and GHCR.
- Deployed the system on Render with version-controlled releases ensuring reproducibility and rollback capability.
- Integrated LLM-based error analysis to generate debugging insights from runtime failures.

Bank Risk Controller Systems

Dec 2025

Key Skills: Python, Scikit-learn, Streamlit, NLP, LLM.

- Built a loan default prediction system using ensemble models such as Random Forest and Extra Trees Classifier.
- Performed exploratory data analysis and feature engineering to identify key patterns in financial data.
- Developed an interactive Streamlit application supporting single and batch predictions via CSV uploads.
- Integrated an LLM-based chatbot using LangChain to enable PDF-based question answering.
- Visualized insights using Seaborn and Matplotlib to support better understanding of risk factors.

Work Experience

Accenture Solutions Pvt Ltd

Oct 2020 – Apr 2024

Transaction Processing Representative

- Processed and validated 25,000+ financial transactions with high accuracy, ensuring data integrity and compliance.
- Performed data validation and quality checks to identify inconsistencies and improve data reliability.
- Analyzed transaction data to detect patterns and reduce errors in processing workflows.

Independent AI & Data Science Projects

Nov 2024 – Present

Self-Driven Learning & Project Development

- Focused on transitioning into AI/Data Science by building end-to-end machine learning and LLM-based projects.
- Developed production-ready systems including ML APIs, data pipelines, and interactive applications.
- Worked with tools such as Python, Scikit-learn, FastAPI, Docker, and Streamlit for deployment.
- Strengthened skills in machine learning, NLP, and system design through hands-on project development.

Education

Advanced Programming and Master Data Science Program

Feb 2024 – Sep 2024

GUVI Geek Networks (IIT Madras Incubated)

Master of Computer Applications (MCA)

Aug 2019 – Jun 2021

Dr. M. G. R Educational and Research Institute

Bachelor of Computer Applications (BCA)

Jul 2016 – Jun 2019

Dr. M. G. R Educational and Research Institute

Certificates

- Master Data Science 
- Python 
- Power BI 
- Data Analytics using pandas
